

Executive summary of Multimorbid Patient Care Optimisation across the East of England

Published on [Working with the NHS \(astrazeneca.co.uk\)](https://astrazeneca.co.uk)

Project title	Multimorbid Patient Care Optimisation across the East of England
Duration	28th February 2021 until 1 st June 2023
Project partners	Eastern Academic Health Science Network (EAHSN) and AstraZeneca UK Limited
What was the issue to be addressed?	The aim of this project is to improve short and long term outcomes for people living with: <ul style="list-style-type: none">• Type 2 Diabetes and Established Cardiovascular Disease or Heart Failure• Type 2 Diabetes and risk factors for developing Cardiovascular Disease or Heart Failure• Heart Failure patients without Type 2 Diabetes
What were the results?	More patients were able to access both appointments with appropriate clinicians and diagnostic blood tests. Fewer patients needed GP appointments and there was an overall reduction per patient in the cost of clinical appointments
