

Executive summary of Cardio Renal Metabolic Joint Working Outputs

Published on [Working with the NHS \(astrazeneca.co.uk\)](https://astrazeneca.co.uk/working-with-the-nhs)

Project title	Cardio Renal Clinic Joint Working Project
Duration	November 2022 to March 2023
Project partners	Carillon Primary Care Network and AstraZeneca UK Limited
What was the issue to be addressed?	Increase PCN clinical capacity to review the backlog of Cardio, Renal and Metabolic (CVRM) patients caused by COVID-19. The new clinics will be in-addition to the existing clinics normally provided by the GP Practices within the PCN and won't seek to replace existing clinics made available to patients. Reduction in long waiting times to be seen by a 'specialist' Drive improvement of understanding within primary care to effectively manage CVRM patients. Education support for multiple stakeholders within primary care.
What were the results?	The output from this project was 368 patients were triaged for review and 289 patients were seen in consultation clinics over 16 weeks.
