

Executive summary of Joint Working Outputs

Published on [Working with the NHS \(astrazeneca.co.uk\)](https://www.astrazeneca.co.uk/working-with-the-nhs)

Project title	GM Cancer Phase 2 Self-Referral Chest X-Ray Pathway
Duration	14 th October 2022- 31 st December 2022
Project partners	The Christie NHS Foundation Trust and AstraZeneca UK, 2 St Pancras Square London N1C 4AG.
What was the issue to be addressed?	The project aim is to; To pilot the operational model (developed in phase 1 of the project) in the pilot area. Evaluate all quantitative and qualitative data.
What were the results?	Operational model successfully piloted in Bury, Heywood and Middleton. Quantitative data evaluated – including number of patients accessing the service, number of lung cancers and staging of lung cancer identified, number of non-lung cancer but further investigation required, demographics of population utilizing the service, response rates (of service usage) to different forms of advertising media utilised. Qualitative data evaluated – patient questionnaire on current health status and reasons for utilising the service, interviews with patients in order to assess view of the service. Fully costed business case being written up in order to bid for NHS general commissioning.
