Project title	INTERACT Project - INTEgRAted care Clinics To Improve PCN COPD Care
Duration	14/10/24 to 14/7/25
Project partners	South Stoke Central PCN and AstraZeneca UK
What was the issue to be addressed?	Optimise treatment and management of COPD patients by providing high quality reviews and upskilling the PCN workforce to deliver better COPD care. Utilising secondary care COPD specialists to deliver COPD clinics in primary care.
What were the results?	<p>277 patients were reviewed over the project duration. There was an 79% improvement in the number of patients with a COPD care plan.</p> <p>100% of PCN staff surveyed scored the joint consultation experience as 5 out of 5, (very helpful) to work alongside COPD specialists from UHNM.</p>
