

A DECLARATION OF JOINT WORKING BETWEEN PRINCESS OF WALES HOSPITAL (Cwm Taf Morgannwg University Health Board) AND ASTRAZENECA UK LTD

Princess of Wales Hospital (Cwm Taf Morgannwg University Health Board), and AstraZeneca Ltd are engaged in a Joint Working Project entitled, “Optimisation of RAASi therapy to improve treatment of heart failure patients in secondary care”

This project will run from November 2022 to November 2023. Both parties have contributed resources for this initiative.

The aim and objectives of this project are:

- Provide additional clinical capacity in the form of a pharmacist to support the initiation of guideline-based therapies in secondary care
- Alleviate pressure points within The Princess of Wales Hospital to enable revision to working processes and to augment patient outcomes. Additional capacity will allow HF specialist nurses to provide more comprehensive HF in reach service which can translate into better patients care.
- Provide additional educational support for HF nurses and pharmacists in the management of HF
- Improve the management of patients with sub-optimal management of their Heart Failure in line with national clinical guidelines.
